## Work Experience

### Software Engineer

11/2018 to Present – Stripe, Seattle, WA

- Building payments infrastructure for Stripe in Latin America.

### Software Engineer

1/2015 to 11/2018 – Airbnb, San Francisco, CA; Seattle, WA

- Airbnb Android app platform infrastructure;
- Build infrastructure for backend micro services mono-repository.

### Lead Android Engineer

7/2012 to 12/2014 – We Heart It, San Francisco, CA

- Lead developer for the We Heart It Android app;
- Full stack Rails development;
- Data analysis with Hadoop and Amazon Elastic MapReduce.

### Senior Software Engineer

12/2011 to 07/2012 – Trip by Skyscanner (formerly Gogobot), Menlo Park, CA

Ruby on Rails backend and front-end for the [gogobot.com](http://gogobot.com) website. Was responsible for introducing Agile, TDD and CI company wide. Maintain and develop new features, integration with Facebook API and scalability. Dramatically increased product quality and stability by introducing BDD and better design patterns.

### Senior Software Development Consultant

1/2011 to 12/2011 – ThoughtWorks Brazil, Porto Alegre, RS - Brazil

Nearshore team for an investment bank in Manhattan to develop a business-critical customer, trade management software using agile, e.g.: full time pairing, CI/CD, TDD, daily stand-up meetings, etc. Tech stack was mostly Microsoft: C# 4 ASP.NET MVC 3, etc. Build tools and scripts used Rake and Ruby. Used Selenium for functional tests.

## Back End Ruby Developer

1/2011 – 7/2013 – Noite Hoje

Noite Hoje was a side/pet project I started with five other friends. It was a web, iPhone and Android app that listed the best shows and parties in the region. Got to 6th most downloaded Free iPhone app in Brazil. I wrote the backend and API using Ruby, running with Sinatra, Slim, Sass, CoffeeScript, etc.

## Instructor

9/2010 to 4/2011 - TargetTrust Training and Technology, Porto Alegre, RS - Brazil

Taught the “C# 3.0 Programming Language Foundations” course at TargetTrust. Also prepared the class reference book for the LINQ (C# Language Integrated Query) course.

## Co-founder

9/2009 to 12/2010 - Quavio, Porto Alegre, RS - Brazil

Co-founded Quavio with three other friends. The company was focused in digital communication services and cloud software development. I planned, analyzed, managed and implemented websites and intranet systems using mainly C# and Ruby. Starting my own company was an exciting and entirely new experience to me, both very challenging and rewarding.

## Software Engineer/Software Designer

8/2003 to 09/2009 - Hewlett Packard Brazil, Porto Alegre, RS - Brazil

Worked at an offshore HP R&D office in Brazil on the development of several projects related to LaserJet device management. The main projects I’ve worked on were:

- HP Easy Printer Care 1.0
- HP Webjet Admin 10
- HP ePrint

## Tester/Developer Intern

08/2002 to 08/2003 - CPTS (HP Testing and R&D Lab), Porto Alegre, RS Brazil

## Education

12/2010 - IELTS – International English Language Testing System: Grade 7

01/2002 - 07/2008 - Bachelor Degree: Computers Science at PUC-RS

## Languages

- English (Fluent)
- Portuguese (Native)
- Spanish (Basic)
